

COLOR CHART 2020

The right choice of the upholstery color is as important as the quality of the product. That is why we offer a wide selection of various colors of the top quality, water repellent and fire-resistant imitation leather. The leather is highly resistant to disinfectants, salt water, UV rays, micro-organisms and mould. Its elasticity and flexibility ensure comfort positioning of the patients during their therapies. We strongly recommend regular cleaning and removal of residues of massage oil and crèmes. By careful maintenance of the upholstery you will prevent cracked leather and extend your table's useful life.
